PART 1

[8 *marks*]

[*Time suggested: Fifteen minutes*]

Questions 1 to 8 *are based on the given stimuli.*

Read the information carefully and choose the **best** *answer* **A**, **B** *or* **C**.
For each question, mark your answer **A**, **B** *or* **C** *on your answer sheet.*

KAJANG: Water supply recovery in affected areas has reached 18.4%, with an expected increase to 20% by 3 p.m. today, 90% by 3 a.m. on Friday, and full recovery expected by noon tomorrow. Air Selangor advises consumers to let taps run until the water runs clear before daily consumption and to use water judiciously to facilitate a smooth recovery process.

News Straits Time, 6 June 2024

1 Which of the following is **true** about the text?

A Water supply recovery from 20% to 90% is expected at a constant rate.

B By midday the following day, the water supply should fully return.

C Users are advised to turn off the taps until the water is clear.

UG TWIN WASH MAX

A perfect solution for daily laundry, the UG Twin Wash with AI Drive allows you to operate or monitor your laundry even from a couch.

UG Twin Wash Max system allows you to do two loads of washing at the same time. It also guarantees to eliminate 99.9% of allergens with Steam Cycles and save energy. What's more, it also comes with Intelligent Clothing Care with AI Direct Drive which makes laundry less of a chore.

2 Based on the advertisement, we know that UG Twin Wash can

A wash two loads simultaneously.

B only be controlled by voice command.

C ensure the washing loads are germ-free.

PART 3

[8 *marks*]

[*Time suggested: Twenty minutes*]

Questions 19 to 26 *are based on the following passage.*

Read the passage carefully and choose the **best** *answer* **A**, **B**, **C** *or* **D.** *For each question, mark your answer on the answer sheet.*

If you ask people to pick their choice of the greatest invention in the field of communication technology, most of them will pick the internet. It's surprising to know that in the 1990s, not many people had even heard of it, let alone had access to it, but, as of 2021, more than 59% of the world's population has got the access.

The internet is a network of networks that connects millions of computers across the world. Specifically, it's a group of networks that consists of government, private sector, university, and business networks that are linked by wireless, optical, and electronic technologies.

There are many reasons why the internet is a source of entertainment. It offers a lot of free online games to play as well as websites that allow you to watch movies, TV series, and videos, and listen to music for free. Besides, there are chat rooms and forums that give you the chance to chat, discuss, and share ideas with others.

Next, the internet can keep you well informed of what's happening around the world. You can read about current news or find out about the latest developments in governments, politics, sports, major events, or festivals taking place in even the most remote places in the world. Likewise, it gives businesses a platform to advertise their wares. You can do comparison shopping easily and search for the products and services that meet your needs without having to visit numerous brick-and-mortar stores.

Lastly, the internet makes shopping online possible. There are thousands of virtual stores offering a wide selection of products, and the number is increasing every year. The internet has revolutionised shopping and kicked off an entirely new way of selling and shopping. At the same time, it has allowed many people to start their small businesses to sell their homegrown products.

On the other hand, the internet has several drawbacks that we cannot ignore. First, it isn't a safe place for children and young adults. As you know, the internet offers a lot of information, but not all of it is suitable for children and young adults. Parents have to be aware of what their children are looking at on the internet and limit access to it so the latter won't have access to websites that contain strong and inappropriate language and content. Moreover, many unethical communities or websites share content that exposes children to situations, ideas, or materials that can upset and confuse them. This can lead to misinformation or tempt children into dangerous situations or behaviours.

Second, the internet allows people to communicate and share information through social media platforms. As long as you're online and other people have your email or access to your social media, they can harass or bully you. Finally, navigating through the internet

[Lihat halaman sebelah

isn't always safe. If you don't take precautions to safeguard your online privacy, hackers can access important personal information.

The internet has impacted our lives in many positive ways. Though it has several drawbacks, its advantages far outweigh them, cementing its importance in our daily lives.

19. Which of the following statements is **true** in the first paragraph?
    A. The internet is easily accessible.
    B. The internet is a recent invention.
    C. The internet is slowly gaining popularity.
    D. The internet is the most convenient way to communicate.

20. In paragraph 3, how can the internet enhance students' life?
    A. It provides them with the latest information.
    B. It offers a variety of good resources.
    C. It simplifies the research process.
    D. It widens their knowledge.

21. In paragraph 4, the writer highlights that the internet is informative because it
    A. allows people to connect easily.
    B. allows people to make new friends.
    C. gives easy access to new knowledge.
    D. helps people express themselves creatively.

22. The internet can help people save money in the following ways **except**
    A. finding products and services easily.
    B. eliminating the cost of travelling to stores.
    C. shopping at stores that offer the best prices.
    D. getting the latest news on products for free.

PART 5

[8 *marks*]

[*Time suggested: Twenty minutes*]

Questions 33 to 40 *are based on the following texts. Read the texts carefully and answer the questions that follow.*

CULTURAL PRACTICES

A - Carlos, 21 years old

I love celebrating cultural festivals. For me, traditional dance and music are key elements. They bring people together and foster a sense of community. Whether it's a local festival or a national celebration, participating in these events helps me stay connected to my roots. Traditional costumes worn during these events also play a significant role in showcasing our heritage.

B - Amina, 30 years old

Food is an integral part of our culture. Preparing and sharing traditional meals with family and friends during festivals or special occasions is something I cherish. All the dishes tell stories of our ancestors and can be a way to preserve our culinary heritage. I believe that through food, we can connect with our culture on a deeper level.

C - Ravi, 25 years old

I think cultural rituals and ceremonies are important. They mark significant life events and milestones. For instance, weddings, coming-of-age ceremonies, and festivals each have their own set of rituals that are followed meticulously. These practices help in passing down traditions from one generation to the next and keep our culture alive.

D - Mei, 28 years old

Art and craft are my favourite aspects of culture. I enjoy making traditional handicrafts and learning about different art forms that are unique to my heritage. These activities are not only creative but also help preserve the skills and techniques that have been passed down through generations. It's a way to express cultural identity and pride.

E - Ahmed, 35 years old

Language is a vital part of culture. Speaking and learning our native language helps us maintain our cultural identity. It's more than just a means of communication; it's a way to understand our history, literature, and traditions. Language connects us to our ancestors and is crucial for cultural preservation.
